

1)

$$\frac{3}{8} + \frac{3}{8}$$

2)

$$\frac{5}{6} + \frac{1}{6}$$

3)

$$\frac{5}{3} + \frac{5}{3}$$

4)

$$\frac{3}{5} + \frac{4}{5}$$

5)

$$\frac{5}{8} - \frac{1}{8}$$

6)

$$\frac{9}{7} - \frac{4}{7}$$

7)

$$\frac{5}{3} - \frac{5}{3}$$

8)

$$1 - \frac{2}{5}$$

Challenge 1, 2 and 3:

$$\frac{3}{7} + \frac{5}{7} = \frac{\square}{\square} + \frac{4}{7}$$

$$\frac{9}{5} - \frac{5}{5} = \frac{6}{5} - \frac{\square}{\square}$$

$$\frac{2}{3} + \frac{\square}{\square} = \frac{11}{3} - \frac{4}{3}$$
