Y2 – Arithmetic Addition – Lesson 1

Hello Year 2s!

Today, we're solving a variety of addition problems. Before you get started on this worksheet, make sure you've watched the video where I explain how to solve similar problems using a few different strategies.

1. $3 + 3 + 2 = 8$

2. $12 + 5 = 17$

3. $45 + 3 = 48$

4. $23 + 45 = 68$

5. $34 + 50 = 84$

6. $7 + 5 + 3 = 15$

7. $50 + 40 = 90$

8. $48 + 24 = 72$

If you've finished these and you'd like a challenge, ask your adult to set you a few more questions to solve.
