

Tree Booklet Answers

First, read the text with an adult and talk about it. Look at the glossary I've created. Find the glossary words in the text.

Next, answer the following questions about the text:

Read and look at the contents page.

1. Why is the contents page a useful tool?
It tells us on which page we find certain information.
2. How many trees are in the Birch family?
3
3. How many different families of trees are there in this book?
11

Read the section named **Our Trees**.

4. Choose the statement which describes the section best:
 - a. It is a set of instructions.
 - b. It introduces you to the text.
 - c. It tells a story.
 - d. It is a summary about the trees.

Read the sections about the English Oak and the Sessile Oak tree.

5. Which tree can be found in upland forest? **Sessile Oak**
6. What is the difference between the fruit of the two trees? **The English Oak has acorns with a stalk and the Sessile has acorns without a stalk.**
7. In which forest would you find one of the UK's largest oak trees? **Sherwood Forest**
8. How many insect species is the sessile oak a home for?
40 400 **280** 50,000
9. Why do you think there is a small square box next to the name of each tree?
(tip: look at the Our Tree section to help find the answer)
So that you can tick it to show that you have found this type of tree.
