

Maths – Year 4 – Shape – Lesson 1 – Answers

The arrow on a spinner started in this position.

After making a turn it ended in this position.

Jack says, The arrow has moved a quarter turn anti-clockwise.

Alex says, The arrow has moved a three-quarter turn clockwise.

Who do you agree with?

Both children are correct.

The letter 'X' has four angles.

Write your name in capital letters.
How many angles can you see in each letter?
How many angles are there in your full name?

Answers will vary depending on the children's names.

I agree with both children because if you follow each instruction, you still end up pointing the same way.
