

Y4 – Maths – Shape – Lesson 10 – Answers

LO: 2d shapes

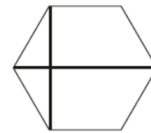

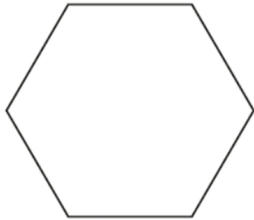

Identify and explain the two mistakes in the Venn diagram.

1. The rhombus should not be in the 'regular shape' section as its angles are not equal.
2. The trapezium has more than three sides so should be in the 'more than three sides' section.

Here is a hexagon.

Draw **two** straight lines across the hexagon to make two triangles and two quadrilaterals.
